

Security & Audit Services

audius

### Risk Assessment / OpRisk Management

Know what stops your business operations, know what harms your reputation!  
Know where to put your money first!

### Structural Analysis / OpSec

Know your operational security!  
Know what is where! Know your trust!  
Know your controls! Know functional & non-functional requirements!

### Risk Treatment / Actionplan

Design perfect operational security!  
Balance your assets, trusts, controls & limitations!

### Improve & Mitigate

Implement technical & process measures to improve current operational security!

### Compliance Management

Know your legal framework! Know which law, standard or regulation to follow & which could be a treat to the business!

### Process Organization

Know how processes deal with the human factor in security!

### Security Tests & Audits

Make the reality check! Pentests, infrastructure maturity audits & technical assessments as catalyst to learn how your controls need to work!

### Monitor

Continuously measure / manage operations, security, limitations & trusts!

### The audius Method

From Risk to Business:

- Neutral unbiased methods & metrics
- Transparent tests & audits
- Comparable results
- Measureable results
- Reports & results which make sense
