

Security & Audit Services

audius

Risk Assessment / OpRisk Management

Know what stops your business operations, know what harms your reputation!
Know where to put your money first!

Structural Analysis / OpSec

Know your operational security!
Know what is where! Know your trust!
Know your controls! Know functional & non-functional requirements!

Risk Treatment / Actionplan

Design perfect operational security!
Balance your assets, trusts, controls & limitations!

Improve & Mitigate

Implement technical & process measures to improve current operational security!

Compliance Management

Know your legal framework! Know which law, standard or regulation to follow & which could be a treat to the business!

Process Organization

Know how processes deal with the human factor in security!

Security Tests & Audits

Make the reality check! Pentests, infrastructure maturity audits & technical assessments as catalyst to learn how your controls need to work!

Monitor

Continuously measure / manage operations, security, limitations & trusts!

The audius Method

From Risk to Business:

- Neutral unbiased methods & metrics
- Transparent tests & audits
