

MANAGED SERVICES FOR MOBILE DEVICE MANAGEMENT (MDM)

Optimum availability for mobile devices

The only way to protect business-critical data within a company is by meeting key security requirements such as encryption and policy enforcement in mobile device management.

A secure mobile infrastructure thanks to audius Managed Services for Mobile Device Management

audius Managed Services for Mobile Device Management help you respond to a rapidly changing mobile market and its attendant security requirements.

Managed services include all services for optimizing business processes: In addition to infrastructure operation, these include creating and implementing your compliance rules for mobile devices and complying with GDPR regulations in the event of the loss or theft of the mobile device. **audius Managed Services for Device Management** thus help you satisfy all security criteria for mobile use at your company.
